

IDAHO POTATO PULSE

Brought to you by the Idaho Potato Commission
Website: www.idahopotato.com

This sign was posted in the lunchroom of the law firm retained by the National Potato Council. This is an example of being really committed to a client.

The company's web site is: http://compostablegoods.com/product_info.php?products_id=208

Please don't eat the forks...

We have replaced the disposable cutlery in this pantry with "Tater Ware" as part of our green initiative. This product is biodegradable. The plastic is made from naturally-occurring plant starch in potatoes. The process used to make "Tater Ware" also uses 30 to 50 percent less fossil fuel than what is required to make a comparable quantity of petroleum-based plastic.
