Singapore

Food and Agricultural Import Regulations and Standards - Certification

FAIRS Export Certificate Report 2017

Approved By:

Joani Dong, Regional Agricultural Attaché
Malaysia, Singapore, Brunei and Papua New Guinea

Prepared By:

Ira Sugita, Agricultural Specialist

Report Highlights:

This report discusses export certificates that the Singapore Government require. The Agri-Food and Veterinary Authority (AVA) is the national authority responsible for ensuring food safety and food regulations in the country. Generally, while Singapore maintains a liberal and open trade system, it has strict regulations – especially on the imports of meats, poultry and shellfish for mainly food safety reasons. For detailed information on Singapore’s regulatory infrastructure and import control policies, and overviews of laws and requirements for imported food/agricultural products, please refer to the latest GAIN FAIRS Narrative 2017.

SECTION I. LIST OF ALL EXPORT CERTIFICATES REQUIRED BY GOVERNMENT (MATRIX):

Complete details can be found on the [FSIS Form Export Library \(Singapore\)](#) – Most recent update on August 24, 2017

Products	Title of Certificate/s	Attestation Required on Certificate	Purpose	Requested Ministry
Poultry	FSIS forms 9060-5 and 9435-1 Letterhead Certificate (FSIS Form 2630-9)	Slaughter/Production Dates Mainly AI related matters including heat treatment	Food Safety Food Safety	Agn-Food & Veterinary Authority of Singapore (AVA)
Pork	FSIS forms 9060-5 & 9435-1 Letterhead Certificate (FSIS Form 2630-9) for Hog Casings	Slaughter/ Production Date; Trichinae testing (9060-5) Pork was treated to destroy trichinae (9435-1) Free of FMD and swine diseases	Food Safety Food Safety	AVA AVA
Beef Boneless and bone-in cuts are allowed provided the establishments are in the Agricultural Marketing Service's (AMS) Beef Export Verification program for Singapore. There is a registration and approval process with AVA for processed beef and beef offal products, which establishments must complete prior to export. The registration and approval process is in addition but separate from the AMS EV program requirements.	FSIS forms 9060-5 & 9435-1 Letterhead Certificate(FSIS Form 2630-9)	Slaughter / Production Date Mainly BSE related matters	Food Safety Food Safety	AVA AVA

Please click here for the report.				
Frozen oysters, frozen blood cockle meat, frozen cooked prawns, frozen raw/cooked crab meat and live oysters Live oysters	Any State Export Health Certificate	Each consignment must be accompanied by a health certificate issued by the competent authority of the exporting country, certifying that Singapore's animal health and food safety requirements have been complied with. Each consignment must be accompanied by a health certificate issued by the relevant authority of the exporting country. Import is only allowed from countries which meet AVA's requirements for a shellfish sanitation program. Aside from the U.S., countries currently approved are Australia, Canada, France, Ireland, the Netherlands, New Zealand and U.K.	Food Safety	AVA
Fresh fruits and vegetables (unprocessed and raw fruits and vegetables)	N/A	According to the Control of Plants (Import & Transshipment of Fresh Fruits & Vegetables) Rules, fresh fruits and vegetables imported should not contain any prohibited pesticide, or Levels of pesticide residue or toxic chemical residue exceeding the prescribed levels specified in the Ninth Schedule of the Food Regulations or recommended in the Joint FAO/WHO Codex Alimentarius Commission.	Food Safety	AVA
Processed food	Health certificates and laboratory analytical reports may be required for specific food products.	Varies according to specific food products	Food Safety	AVA

	Documentary proofs are required for specific foods to indicate that the imported products are produced under sanitary conditions in regulated establishments; including infant cereal and formulas, pasteurized liquid milk, minimally processed fruits and vegetables and traditional cakes.			
Natural Mineral Water & Spring Water	Authentication Certification issued by authority of country of origin to certify that the mineral water is genuine. Map of site location Export health cert including microbiological analysis & chemical analysis results	Microbiological tests and chemical tests to confirm that microbe level and chemical residue level not to exceed those laid down in the Food Regulations Act	Food Safety	AVA
Packaged drinking water (including distilled water, drinking water and mineralized water)	Copy of the factory license where the water was processed and packaged. Export health cert including microbiological analysis & chemical analysis results	Microbiological tests and chemical tests to confirm that microbe level and chemical residue level not to exceed those laid down in Food Regulations Act	Food Safety	AVA
Soy sauces, oyster sauces and sauces containing soy or oyster sauce	Analysis report and 3-MCPD laboratory	Analysis report that ingredients must not be detected with more than 0.02 ppm of 3-monochloropropane-1,2-diol (3-MCPD)	Food Safety	AVA
Further processed egg products, such as cooked omelets, frozen egg patties, and hard boiled eggs. Table eggs	AMS Sanitation Certificate (Processed Egg and Egg Products Export Certificate) Shell Egg Grading Egg Certificate	Product is wholesome, fit for human consumption; and free from harmful levels of contaminants. Grading of shell eggs and disease free statements.	Food Safety Food	AVA AVA

			Safety	
Processed eggs and foods containing eggs, such as liquid, frozen, or dried eggs, with or without added ingredients.	FSIS Form 9060-5EP (Egg Product Export Certificate of Wholesomeness)	Eggs should meet FSIS requirements and eligible for commerce.	Food Safety	AVA
	FSIS Letterhead Certificate	Products are fit for human consumption.	Food Safety	AVA

NOTE:

FSIS - Food Safety and Inspection Service

AMS - Agricultural Marketing Service.

AMS' Sanitation Certificate is the official form and specific to the Processed Eggs and Egg Products Export Verification (PEEPEV) Program

SECTION II. PURPOSE OF SPECIFIC EXPORT CERTIFICATE(S)

Please refer to the Matrix under Section I.

SECTION III. SPECIFIC ATTESTATIONS REQUIRED ON EXPORT CERTIFICATE(S)

Please refer to the Matrix under Section I.

SECTION IV. GOVERNMENT CERTIFICATE'S LEGAL ENTRY REQUIREMENTS

Food/food products entering Singapore must originate from sources approved by AVA. Overseas food establishments exporting specific types of food are required to obtain the relevant accreditation/procedures; including meat and meat products, processed eggs, fresh table eggs, poultry and poultry products, certain types of processed food, and fish and fish products. Applications need to be submitted through the competent authorities of exporting countries.

Fresh fruits and vegetables and certain types of processed food products must be obtained from establishments regulated by overseas competent authorities. However, no application for AVA accreditation is required.

Upon meeting the requirements for approval of imported food sources, the next step would be to apply for an import permit at

<https://www.tradenet.gov.sg/oratxweb/pfk/PfkMainServlet?pAction=FIRST&pStd=YES&pPortalId=ORATX&pContents=ora/HomeServlet?pTarget=registration> via the TradeXchange system. AVA requires an import permit for all food and food products brought into Singapore, irrespective of the mode of transport – i.e. air, land, sea or parcel post.

Meat and poultry products

Every consignment of imported meat products must be accompanied by a health certificate issued by a veterinary authority of the exporting country, essentially certifying that Singapore's animal health and food safety requirements are met. Consignment of meat products will be inspected by AVA – including consignment of meat and poultry is physically examined for wholesomeness and freedom from disease and spoilage; and samples of meats and poultry are routinely taken for laboratory microbiological tests. Some consignments may be placed on “hold and test” pending the outcome of the laboratory analysis.

For the U.S., all FSIS export certificates accompanying the meat product must be signed by a FSIS veterinarian; and the veterinary degree must be indicated after the signature.

NOTE to Exporter: There is a registration and approval process with AVA for processed beef and beef offal products, which establishments must complete prior to export. The registration and approval process is in addition but separate from the AMS EV program requirements. Information regarding this process and details of Singapore's residue limits for beef offal are detailed in the FSIS's Export Library: *GAIN Report Singapore Opens Market to Full Range of U.S. Beef Products*. Please click [here](#) for the report.

Shellfish

Generally, fish and fish products can be imported from any country without obtaining a health certificate. Imported fish products are subject to mandatory inspection by AVA before sale is permitted. Sampling for laboratory analysis may be required. Some consignments may be placed on “hold and test” pending the outcome of the laboratory analysis before sale is permitted. An import permit issued by the AVA, is required for every consignment of fish products.

Stringent control is directed towards selected high-risk shellfish products such as oysters, clams, mussels, scallops and cooked crab meat. High-risk shellfish products may only be imported from sources with acceptable shellfish sanitation programs. As these selected shellfish products are considered as high-risk products, each shipment must be accompanied by a health certificate issued by the competent authority of the exporting country, certifying that Singapore's animal health and food safety requirements have been complied with.

Restrictions also apply for fish species listed under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). Exporters are required to obtain the following permits that must be accompanied every product under the CITES:

- CITES import permit from AVA
- CITES export/re-export permit from the country of export

Imports are not allowed for some high risk products, including the following:

- Chilled shucked raw oysters
- Chilled cockle meat
- Chilled cooked prawn/shrimp
- Chilled crab meat

Fresh Fruits and Vegetables

In general, fresh fruits and vegetables imported from the U.S. do not require export health or phytosanitary certification, but usually must undergo routine checks on arrival and are tested for pesticide residues. Exporters must ensure that the containers (baskets, cartons, etc.) of the produce are labelled properly, including: name and address of the producers, product description and date of export / packing. For processed food products and fresh fruits/vegetables, no application for AVA accreditation is required.

For preserved fruits and vegetables, exporters are required to comply with the labeling requirements stipulated in the Food regulations, including microbiological standards, the use of food additives (e.g. chemical preservatives, sweetening agents, colors, etc.) and the maximum limits for various pesticide residues. For minimally processed peeled fruits and vegetables, microbiological and chemical tests are carried out on these products. For certain commodities, such as groundnuts, pistachios, cashew nuts and corn, upon importation they are subject to inspection and chemical analysis for aflatoxins or other mycotoxins. They can only be allowed for sale in Singapore after they have passed laboratory tests.

Processed foods

The import and sale of food products in Singapore are governed by the Sale of Food Act and Food Regulations. Importers must ensure that the food products imported for sale in Singapore comply with the food standards and labelling requirements stipulated in the Food Regulations.

Supporting documents such as health certificates and laboratory analytical reports may be required for specific food products when applying for import permits. When submitting the documents, please state the Unique Reference No of the declaration and the AVA Registration Number on the top right hand corner of each document.

For certain types of processed food products, exporters have to produce documentary proof that the imported products are produced under sanitary conditions in a regulated establishment.

The regulated source documents that AVA accepts as documentary proof include:

- Certificate of HACCP (Hazard Analysis Critical Control Point)
- Certificate of GMP (Good Manufacturing Practices)
- Health Certificate (issued by competent food or veterinary authority of exporting country)
- Attestation of export (issued by competent food or veterinary authority of exporting country)
- Factory license (issued by regulatory authority of the exporting country).

All imported processed food products are subjected to inspection. Samples may be taken for laboratory analysis. In certain cases of food items, a conditional approval message will be posted on the import permits to require traders to contact AVA for an inspection.

Specific food products

For the import of specific food products, additional documents such as laboratory reports and health certificates may be requirement during import permit application. Examples of specific food products

include mineral water, soy sauce and oyster sauce.

For additional information on specific food products and their requirements, please click at <https://www.ava.gov.sg/docs/default-source/default-document-library/import-requirements-of-specific-food-products.pdf?sfvrsn=0> (*) (updated as of March 24, 2016).

Bottled natural mineral water and drinking water

According to AVA, there are several types of bottled drinking water imported into Singapore, including the following:

- Natural mineral water is obtained directly from underground with or without ionization. Natural mineral water contains trace amount of minerals. The amount and type of mineral present in natural mineral water vary with the location from where the water is extracted.
- Packaged drinking water includes spring water, mineralized drinking water and distilled water. They are drinking water that are obtained from different sources or that have undergone different forms of treatment.
- Spring water is underground water that flows naturally to the surface of the earth.
- Mineralized drinking water is drinking water with added minerals.
- Distilled water is water purified by the process of distillation, which involves a process of turning the water into steam and re-condensing it by cooling.

Before importation, the importer is required to submit the following documents to AVA:

- The original copy of the certificate issued by the government controlling authority of the country of origin to certify that the natural mineral water or spring water is genuine.
- Site plan showing the source of the natural mineral water
- A health certificate showing that the natural mineral water to be imported complies with the standards required by Regulation 183A of the Food Regulations
- Label of the products to show that the labelling complies with the requirements of the Food Regulations.

The health certificate is required from the country of origin for every consignment of all types of bottled drinking water, and it should provide the following information:

- Description of product
- Product codes, batch number or marking. This should be indicated on the product label/carton box

- Departure date from the exporting country and name of vessel
- Particulars of exporter
- Particulars of consignee
- Results of microbiological & chemical tests.

Upon arrival of the consignment, AVA will inspect, collect samples for laboratory analysis and then seal the consignment. The consignment will only be released to the market after the laboratory analysis report shows that the product complies with the requirements of the Food Regulations.

Soy sauce and oyster sauce

Soy sauces, oyster sauces and sauces containing soy or oyster sauce as an ingredient, must not be detected with more than 0.02 ppm of 3-monochloropropane-1, 2-diol (3-MCPD). Importers are to submit analysis reports to AVA prior to importation. The analysis report must come from an independent laboratory on the level of 3-MCPD (3-monochloropropane-1, 2-diol) in the soy/oyster sauce for consideration before importation. The report should include the brand of sauce, type of sauce, grade of sauce, country of origin, batch number, date of laboratory test, name and country of laboratory, level of 3-MCPD detected (fresh weight), and detection limit of 3-MCPD (detection limit should not exceed 0.01ppm and is based on 40% dry matter in the product).

Fresh Eggs

Eggs must come from AVA-approved layer farms and only from the following countries: U.S., Australia, Japan, West Malaysia, New Zealand, Sweden and Korea (as of January 29, 2015). Each consignment of fresh eggs must be derived from a single farm.

Every imported consignment must be accompanied by a veterinary health certificate issued by the relevant veterinary authority of the exporting country, and the certificate must be dated within seven days of import.

Processed eggs

Eggs must be imported from AVA-approved sources. Please click at <https://www.ava.gov.sg/tools-and-resources/accredited-overseas-meat-and-egg-processing-establishment> (*) for AVA database to search for approved overseas food establishments.

Each consignment of processed eggs must be accompanied by a health certificate issued by the competent authority of the exporting country. This is to certify that the imported products comply with Singapore's animal health and food safety requirements.

SECTION V. OTHER CERTIFICATION/ACCREDITATION REQUIREMENTS

For further details on food requirements in the Singapore market, please check FAS/Singapore Food and Agricultural Import Regulations & Standards Country Report/Narrative, Exporter Guide and Retail Report at the following web portal:
