Travis Blacker  
Director, Industry Relations

Established in 1937, the Idaho Potato Commission (IPC) is a state agency that is responsible for promoting and protecting the famous Grown in Idaho® seal, a federally registered trademark that assures consumers they are purchasing genuine, top-quality Idaho® potatoes. Idaho's ideal growing conditions, including rich, volcanic soil, climate, and irrigation, differentiate Idaho® potatoes from potatoes grown in other states.

This directory is published by the Idaho Potato Commission and contains a listing of licensed fresh shippers, brokers, and processors at the time of publication. IPC does not recommend individual shippers or processors, but the ones listed here use genuine Idaho® potatoes, and their practices reflect the superior quality of the raw materials they use. Customers who have unique requirements will find Idaho suppliers well equipped and eager to fill their needs. 2020 edition. Most recent photography by Travis Blacker.

# Our Most Popular Russets

## Russet Burbank

**Background:** Developed in 1914 by Lou Sweet, a previous president of the Potato Association of America. Scientist Luther Burbank is credited with the discovery of the original seeds. While Idaho growers have successfully produced many varieties over the years, the Russet Burbank is their greatest commercial success and has established a strong brand equity for the state. A late-maturing variety that requires a 140- to 150-day growing season.

**Appearance:** The exterior skin is relatively thin and light brown in color. The exterior shape is oval and slightly flattened, with few shallow eyes. The interior is off-white to ivory and moderately dense.

**Flavor Profile:** A distinctive, earthy potato flavor. The high solid (starch) yields a grainy texture and slightly chewy skin. Bakes up dry and fluffy; fries crisp and golden brown.

**Usage:** Fresh, frozen, or dehydrated, this variety is ideal for all preparation styles.

***Idaho® potatoes are unmatched  
in their exceptional quality, wholesome taste, and extensive  
variety. From the go-to Russet Burbank to the popular  
Russet Norkotah, we're proud to offer you the finest  
potatoes from the Best Earth on Earth™.***

### Russet Norkotah

**Background:** Released in 1987 by North Dakota State University, this variety now ranks second in popularity for fresh-market use. Attractive type (refers to consistent oval shape); a high percentage of No. 1 potatoes is common with this early-maturing variety. Available August through June.

**Appearance:** Excellent conformation; attractive medium-brown color with a long to oblong shape.

**Flavor Profile:** A mild potato flavor with a soft texture and moderate density. Tends to bake up creamy and moist, not grainy. Moderately chewy skin. White to pale yellow interior. Medium specific gravity for most; newer generations grown in Idaho have higher starch content.

**Usage:** Grown primarily for the fresh market. Because of the uniform appearance, has had good success in the retail grocery segment and foodservice. Well suited to all preparation types.

### Alturas Russet

**Background:** A late-maturing, high-yielding russet potato cultivar with a high tuber specific gravity that was released in 2002 by the USDA/ARS and the Agricultural Experiment Stations of Idaho, Oregon, and Washington. A high percentage of No. 1 potatoes is common with this variety.

**Appearance:** Excellent conformation and an attractive medium-brown color with an oblong shape. They tend to be short.

**Flavor Profile:** Culinary quality is high, with larger tubers suitable for fresh market if heavily russeted skin is not essential.

**Usage:** Grown primarily for the processed market. Its resistance to the accumulation of sugars during long-term storage also makes it suitable for processing out of storage into french fries. Makes excellent mashed potatoes.

## Bannock Russet

**Background:** Bannock Russet was released in 1999 by the USDA Agricultural Research Service and the Agricultural Experiment Stations of Idaho, Oregon, and Washington. It is a late-maturing, oblong russet variety with excellent fresh-pack and processing qualities.

**Appearance:** It has an attractive russeted skin and short tuber length. Excellent culinary qualities also make it suitable for the fresh market. Bannock Russet, in comparison with Russet Burbank, has consistently produced greater U.S. No. 1 yields.

**Flavor Profile:** Similar to Russet Burbank.

**Usage:** When stored at 45°F, the Bannock Russet produces a lighter fry color and has a lower glucose concentration than a Russet Burbank. Medium to high solids.

## Blazer Russet

**Background:** Named a variety in 2005, this is one of the newest graduates of the potato-breeding program of U.S. university research scientists in the Intermountain West and Pacific. It is ready to harvest earlier than other leading potatoes, meaning the Blazer Russet can replenish dwindling supplies of potatoes remaining in cold storage from the previous harvest.

**Appearance:** The oblong, medium to large tubers average about 7 to 8 oz. each. They have characteristic light russetting on their brown to tan skin, with firm, cream-white, or white flesh inside.

**Flavor Profile:** Similar to Russet Burbank; yields dry and fluffy baked potatoes and golden fries with crisp outer flesh and dry mashed flavor center.

**Usage:** Well suited for fresh-market sale or for potato processors to make into frozen potato products.

## Classic Russet

**Background:** Released by the Tri-State Breeding Program in 2009, this early to medium variety is a possible replacement for the popular Norkotah. It has excellent fresh-merit ratings and exceeds other leading potatoes in its overall score.

**Appearance:** Classic Russet has excellent tuber shape and appearance, and a high proportion of No. 1s, high solids, and good fry color.

**Flavor Profile:** The Classic Russet has a higher protein content than many of the standard russet varieties (22–32 percent greater). It also has a high culinary rating, with qualities similar to Russet Burbank. It is light and fluffy in baking and produces light fries after harvest and shortly thereafter.

**Usage:** Sold in fresh-pack markets and processed right out of the field or during the early storage season.

## Clearwater Russet

**Background:** Released by the Tri-State Program in 2009, this is a medium to late variety for both fresh and processing markets. It has a high protein content, measuring 38 percent greater than Russet Burbank. This variety has an exceptionally high yield average, specific gravity, and high solids.

**Appearance:** It produces oblong tubers with brown, medium-heavy russet skin. The eyes are shallow in depth and intermediate in number and are evenly distributed. Tuber set is low, and average tuber size is medium. The flesh is white to creamy white and firm.

**Flavor Profile:** Qualities similar to Russet Burbank. A light and fluffy baker with excellent fry characteristics and taste, often outperforming Ranger Russet and Russet Burbank in tests.

**Usage:** Its excellent fry color out of storage and its attractiveness make this variety suitable for both processing and fresh-market usage. It has a high specific gravity and is resistant to sugar ends, as well as most internal and external tuber defects.

## Ranger Russet

**Background:** Ranger Russet is a medium- to late-maturing russet potato jointly released by the USDA and the University of Idaho in 1991. It has high solids and is used mostly for frozen processing and occasionally for fresh pack..

**Appearance:** Long and slightly flattened shape with a medium-russet-color skin and white flesh. Eyes are numerous and medium to deep. Produces a consistently long shape and high percentage of U.S. No. 1 potatoes.

**Flavor Profile:** Culinary traits: bakes up dry and fluffy with outstanding potato flavor. Fries crisp and light golden in color.

**Usage:** Grown primarily for the processed market. Because of the high specific gravity (averaging 1.095 in Idaho) and low sugars, this variety processes well for lightly colored fries with good texture.

## Umatilla Russet

**Background:** Umatilla Russet was jointly released by Oregon, Washington, Idaho, and the ARS/USDA in 1998. This cultivar has attributes that make it an excellent choice for frozen processing.

**Appearance:** Attributes include a high specific gravity, good fry color, uniform tuber shape, and good resistance to internal physiological disorders. Umatilla produces significantly more U.S. No. 1 tubers 12 oz. or larger than the Russet Burbank typically does.

**Flavor Profile:** Taste test panels have rated the flavor and texture of Umatilla to be at least as good as or better than Russet Burbank.

**Usage:** Grown for fresh and frozen french fry processing, with fry colors lighter than the Russet Burbank. In general, Umatilla Russet has less glucose and sucrose accumulation in storage compared to that of Russet Burbank.

# Other Varieties

## All Blue

**Appearance:** Smooth, oblong, medium size; deep blue to almost purple skin.

**Flavor Profile:** Moist, firm flesh with slightly grainy texture.

**Usage:** Fresh market. Especially suited to potato salads.

## Ama Rosa

**Appearance:** Small to medium-size, firm, oblong-shaped tubers with bright red skin and deep red flesh.

**Flavor Profile:** Sweet and creamy fingerlings.

**Usage:** Ideal for baking, roasting, and grilling. They also make mouth-watering and colorful potato chips because they retain their sweetness and bright red color.

## Bintje

**Appearance:** Small to medium-size round tubers with golden skin and yellow flesh. Smooth and well rounded. Skin has a silk-like finish.

**Flavor Profile:** Exceptional flavor. Some describe it as having a unique, light, nut-like flavor.

**Usage:** Best served roasted or as french fries; often seen as the standard for European-style or Belgian fries.

## Cal Red

**Appearance:** The tubers have a bright red skin color, round and smooth shape, shallow eyes, and a medium specific gravity for reds. White flesh.

**Flavor Profile:** Waxy; makes a good potato salad; skin color stays red.

**Usage:** Fresh market.

*Traditionally, Idaho has been known for its russet potatoes. After all, that's what made us famous!*

*We grow billions of pounds of potatoes each year—most of which are russet varieties. But many acres are now devoted to reds, yellows, and other niche varieties. So we continue to be a one-stop shop for ordering a wide array of excellent varieties.*

### French Fingerling

**Appearance:** Large fingerling tubers with smooth, dark, rose-red skin and waxy, yellow flesh.

**Flavor Profile:** Has a delicate, nutty flavor.

**Usage:** Especially suited to potato salads, roasting, or sautéing.

### Huckleberry Gold

**Appearance:** Round to oval tubers with purple skin and yellow flesh noted for their excellent culinary qualities and high level of antioxidants.

**Flavor Profile:** Good potato flavor.

**Usage:** Primarily used as mashed potatoes and in salad preparations. Roasting or boiling are also popular cooking procedures.

### Ida Rose

**Appearance:** Oblong tubers with bright red skin that retains color during storage and moist, firm, white flesh. The skin can russet slightly in light soils.

**Flavor Profile:** Considered to be an excellent potato for baking, microwaving, and boiling. Ranks high in taste tests.

**Usage:** General purpose. Popular as a salad potato.

### Milva

**Appearance:** Bright yellow flesh with pale yellow skin.

**Flavor Profile:** Waxy type. Suitable for boiling because it stays firm and does not readily discolor.

**Usage:** General purpose. Popular as a salad potato.

### Norland

**Appearance:** Tubers are oblong, smooth, slightly flattened, and medium red, with shallow eyes. Seldom off-type in shape. Color decreases after maturity. The deep, dark-red skin color is appealing when prepared with the skin on. White flesh. Baby reds typically command a premium price.

**Flavor Profile:** Moist texture, as the specific gravity is low to intermediate. Excellent potato flavor.

**Usage:** Fresh—excellent for boiling, roasting, and salad preparations.

### Purple Passion

**Appearance:** Purple skin and dark purple flesh. High in antioxidants; ideal for fresh fingerling market, with few tuber defects.

**Flavor Profile:** Excellent fingerling flavor.

**Usage:** Fresh market.

### Purple Peruvian

**Appearance:** Fingerling tubers with purple skin and dry, earthy, bright purple flesh.

**Flavor Profile:** Mild potato flavor.

**Usage:** Especially suited to potato salads, roasting, or sautéing.

### Red La Soda

**Appearance:** Light red or pink color, oval shape with smooth skin and a deep red skin color. Eyes have medium depth.

**Flavor Profile:** Considered good for baking and boiling. Ranks high in taste tests. Its moderate specific gravity makes this a somewhat unusual red variety and provides a drier, fluffier texture than is common with reds.

**Usage:** Fresh market.

### Red Thumb Fingerling

**Appearance:** Red skin, red flesh, and smooth skin make this 1-by-2-inch tuber highly appealing.

**Flavor Profile:** It is sweeter than Russian Banana potatoes but not as starchy as some potato varieties.

**Usage:** This variety is best when roasted and is also suitable for potato salads.

### Ruby Crescent

**Appearance:** Plants produce rosy-skinned tubers with moderately dry, yellow flesh.

**Flavor Profile:** Mild, slightly nutty flavor.

**Usage:** Especially suited to potato salads or roasting.

## Russian Banana

**Appearance:** Small fingerling tubers with buff-yellow skin and light yellow, waxy-textured flesh.

**Flavor Profile:** Has a rich, buttery flavor.

**Usage:** Especially suited to potato salads, roasting, or sautéing.

## Terra Rosa

**Appearance:** Red skin and red flesh, oblong shape.

**Flavor Profile:** Similar to other reds; ranks well in taste tests.

**Usage:** Ideal for microwaving, frying, or baking; chips retain rosy color and resist fading.

## Yellow Finn

**Appearance:** Dark yellow, waxy flesh; flattened pear or oval shape; light, tan-yellow skin.

**Flavor Profile:** Waxiness gives it a moist texture accompanied by a rich, buttery taste that is slightly sweeter than Yukon Gold.

**Usage:** Primarily fresh. Boiled, fried, baked, and mashed. Often used in potato salads.

## Yukon Gem

**Appearance:** This round-oblong, yellow-fleshed tuber has an optimal size profile. It has pink, shallow eyes.

**Flavor Profile:** Good waxy to drier texture with a golden buttery taste.

**Usage:** Excellent processed, with a notable taste profile for products such as chips. An excellent replacement or alternative to Yukon Gold for the fresh market. Also has been suitable for organic production.

## Yukon Gold

**Usage:** Relatively light yellow skin color; yellow interior with moist flesh. Shallow eyes that are well distributed. A medium specific gravity.

**Flavor Profile:** Originally marketed as having a buttery flavor, which comes from a combination of the yellow flesh and moist texture. Good potato flavor.

**Usage:** In foodservice, chefs have gravitated to the Yukon Gold image as a positive one for menu branding. Primarily used as mashed and in salad preparations. Roasting or boiling are also popular cooking procedures.

# Licensed Fresh Shippers

Licensed fresh shippers are Idaho-based companies that work with Idaho® potato growers to receive, sort, pack, and ship products out from an active shed.

# Mart Produce Corporation [www.martproduce.com](http://www.martproduce.com)

---

*Mart Produce was established in 1980 by a group of local farms. For more than 30 years, we've supplied a large portion of the potatoes ran through the shed. In 2014, two other partners who had been key suppliers for many years, Jentzsch-Kearl Farms and Grant 4-D Farms, were added as partners to the business. We operate 12 months out of the year in order to provide a regular supply of potatoes for our customers. Our goal is to provide a consistent supply of good-quality potatoes at a fair market price.*

# Wada Farms Potatoes [www.wadafarms.com](http://www.wadafarms.com)

Wada Farms has been growing, packing, and shipping potatoes for over 75 years. We provide a full selection of russets, reds, golds, chippers, organics, and fingerling potatoes — in all sizes and packs available for retail and foodservice customers. We also offer value-added packages for retail and foodservice.

# Licensed Fresh Brokers

The sales of fresh Idaho® potatoes can be arranged through many channels to reach the end user.

We acknowledge the ongoing work that Idaho-based potato brokers do in moving a substantial amount of the Idaho® potato crop to their customer bases in retail and foodservice.

Wada Farms Potatoes

## Julian Dates (leap year)

Julian dates are used by shippers to determine exactly when the potatoes were packed. This date is stenciled on the cartons at the plant. The (leap year) Julian date calendar below may assist in determining in which month a carton or bag of potatoes was packed.

Julian Dates at a Glance (Leap Year)											
	January	1-31		July	183-213						
February	32-60			August	214-244						
March	61-91			September	245-274						
April	92-121			October	275-305						
May	122-152			November	306-335						
June	153-182			December	336-366						

## Julian Date Converter (leap year)

Below is a (leap year) Julian date converter to calculate the specific day/month pack date. You may also enter this link into your web browser: [idahopotato.com/directory/julian](http://idahopotato.com/directory/julian).

Day	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Day
1	1	32	61	92	122	153	183	214	245	275	306	336	1
2	2	33	62	93	123	154	184	215	246	276	307	337	2

82	Nonpareil Farms – Idaho Potato Packers

Shed ID No.	Shipper
84	Pleasant Valley Potato, Inc.
86	Bench Mark Potato Co.
88	GPOD of Idaho
89	Gold Emblem Produce / Taylor & Sons, Inc.
96	Walker Produce, Inc.
98	Walters Produce, Inc.
101	Moody Creek Produce, Inc.
110	Wilcox, Floyd & Sons, Inc.
167	Genesis Organics, LLC
443	Eagle Eye Produce – Twin Falls

## Hints & Tips

### Authenticity

The Grown in Idaho® seal on each carton or bag is a certification mark designating that the potatoes inside came from Idaho.

Some shippers may have products from multiple states appearing with the same private label. Look for the required Grown in Idaho® seal when choosing Idaho® potatoes.

### Storage

The Idaho Potato Commission recommends that cartons be stored with the lids on at a temperature range of 45°F–48°F.

### Tracking Info

In addition to the required potato-variety labeling, each foodservice

carton also shows a shed number to determine which shipper packed the product. You can find this listing in the Shed ID Numbers table on this page.

Each carton also has a "pack date," referencing the date when the potatoes were graded, washed, sorted, and placed in the carton.

The number is a three-digit code that represents the consecutive day of the year—the Julian date—starting with January 1 as 1 and ending with December 31 as 365 (366 in a leap year).

To determine the Julian dates, please see the chart on the previous page or access a Julian date converter to calculate the day/month pack date by entering this link into your Web browser: [idahopotato.com/directory/julian](http://idahopotato.com/directory/julian).

**Idaho® Potatoes**  
are actually not a variety!

The term Idaho® potatoes refers to the source of origin—the state of Idaho. While it primarily produces russets, Idaho also grows several other varieties of potatoes to fulfill foodservice and consumer requests.

Look for the designations in printed type or a stencil on cartons or on the closing device of the retail bag.

# **Idaho® Potato Processors**

For a current list of products,  
please check company websites.

## **Basic American Foods** [www.baf.com](http://www.baf.com)

Jack Hume founded Basic American Foods in 1933 with the belief that integrity and taste were paramount, and these same beliefs drive us today. While we started as a modest dehydration plant in California, we've grown our company and our capabilities over the last 85 years, becoming the market leader, because we want to help people serve great food to as many people as possible. That's why you'll find our foods and brands in restaurants, schools, hospitals, and grocery and club stores around the world.

# McCain Foods USA, Inc. [www.mccainusa.com](http://www.mccainusa.com)

McCain products are found in thousands of restaurants and supermarket freezers across more than 160 countries — one in every four french fries in the world is a McCain fry. In addition to fries, McCain also produces snacks, meals, and vegetables for both the retail and foodservice industries. At McCain, we believe good ethics is good business. This guides who we are, what we do, and how we do it. The result is good food, simply made.
