KNOWING THE PERFECT POTATO

Idaho's growing season of warm days and cool nights, ample mountain-fed irrigation, and rich volcanic soil give Idaho® potatoes their unique texture, taste, and dependable performance. High solids and low moisture content make Idaho® russet potatoes superior to those produced in other states.

KEEPING IT FRESH

STORAGE To ensure maximum quality, store Idaho® potatoes under the following conditions:

- 45°–48°F (do not refrigerate)
- Dark (avoid fluorescent and natural light)
- Good air circulation
- Ideally, 95% humidity

PERFORMANCE Idaho® russet potatoes average 21% solids. To maintain the comforting, covered flavor, and fluffy texture of an Idaho® potato, be sure not to store at temperatures below 42°F. Anything cooler than this causes the starches to convert to sugar, negatively affecting the performance and taste.

RECONDITIONING If it's been a while since your spuds have been in storage—specifically, if they've been stored under refrigeration for several weeks—it is possible to make those potatoes shine again! To recondition Idaho® potatoes, place them in a dark, well-ventilated room at 60° to 70°F for one to two weeks.

SKIP THE FOIL. For the fluffiest, best-tasting Idaho® bakers, skip the foil and let the natural cover of the potato skin seal in the flavor. Foil wrapping is a great way to hold the heat in a baked potato for up to 45 minutes, so give them a wrap **after** baking them.

IDAHO® WHY IDAHO® POTATOES?

SIZING AND PACKAGING MADE EASY

At harvest, Idaho® potatoes are carefully inspected and sorted. The pick of the crop are then sized, weighed, and packaged in convenient carton sizes. The most popular russet sizes are 100, 90, 80, and 70-count boxes. Each carton weighs 50 pounds. The potatoes on the back page are shown at actual size to help you determine the size of those you wish to order.

This wide range of available sizes offers you the versatility needed for ideal menu planning. Although your operation's needs may vary, favorite uses for the various sizes have been determined. Potatoes in the 5- to 6-ounce range are ideal for potato salads, soups and stews, hash browns, and diced or sautéed potatoes. Salad bars and side dishes seek spuds in the 7- to 9-ounce range.

The bigger sizes—10 to 12 ounces—can be hollowed out to make potato skins, served as baked potato side dishes, or topped for tasty lunchtime entrées. Potatoes weighing in at 13 ounces and above make a complete entrée when stuffed, or a hearty side dish for a full dinner. Specialty potatoes and fingerlings are suited for roasting, baking, frying, sautéing or boiling, or for making colorful potato salads.

Idaho® potato cartons or consumer bags contain No. 1 potatoes. In foodservice, the No. 2 russet potatoes are available in 50-pound burlap and paper bags. This offers a great economical option for fresh fries, fresh mashed, and any other use in which

the potatoes' original appearance is less important. Although different in appearance, No. 1 and No. 2 Idaho® potatoes are always consistent in taste and texture.

Be sure to look to Idaho® for all your processed potato needs, too! Ask your supplier about frozen, refrigerated, precut, precooked, and dehydrated products in a variety of styles and pack sizes.

WHAT'S IN A BOX?

The chart below shows the most popular russet count sizes, the number of potatoes per carton, the maximum range in size and the sizes that most of the potatoes in each box will be. Each carton of russet potatoes contains 50 pounds of potatoes. Niche varieties are available in smaller cartons.

HOW TO BE SURE YOU'RE GETTING THE BEST

How can you tell if it's an Idaho® original? It's easy! Just look for the "Grown in Idaho" seal. All cartons and bags displaying this seal are guaranteed to contain genuine Idaho® potatoes. If your carton does not appear to be from Idaho, just contact us at idahopotato.com/contact. Our legal department will trace the potatoes back to their source of origin.

The following chart indicates the most popular russet count sizes, number of potatoes per carton, maximum size range, and the sizes that most of the potatoes in each carton will be. Each carton contains 50 pounds of potatoes.

Note: If your needs call for cartons containing a narrower range of sizes, check with your Idaho® potato supplier.
